

The Traktor Kontrol S4 MK2 is an all-in-one 4 channel hardware DJ controller. This guide will show you how to get started with the Traktor console and software application

1. Getting started (plug in AC adapter)

On the back of the Traktor Kontrol interface, plug in the **AC tip plug** for power. Plug the AC adapter end into any available wall outlet or power bar

2. Getting started (power on the unit)

On the back of the Traktor Kontrol interface, power on the unit by pressing the **power button**

3. Getting started (plug in USB cable)

On the back of the Traktor Kontrol interface, plug in the **USB cable**

4. Getting started (plug in headphones)

On the front of the Traktor Kontrol interface, plug in the **headphones**

5. Plug in USB cable into computer

Plug in the other end of the USB cable into any available USB slot on the back of the Mac computer

6. Importing music

1. Select **TRAKTOR** from menu bar >Open **Preferences** >**File Management**
 2. Click **Add** at the bottom of the **Music Folders** section
 3. Navigate to a folder you want to add
 4. Confirm with **Ok**
- Repeat to add all your Music Folders

Subfolders are automatically included in the scan

TRAKTOR analyzes music for certain characteristics like BPM when importing tracks for the first time. This function takes some time to process

7. Loading and playing a track

Release **SHIFT** and turn the **BROWSE** knob to scroll through the Playlist and navigate to the desired track

Once the track is loaded, simply press the **PLAY** button at the bottom of the deck. When the track starts playing, the PLAY button lights up and the waveform starts moving in the TRAKTOR software

8. Adjusting volume levels

1. Audio Level

Adjust the audio level for each deck by moving the corresponding slider up and down

2. Crossfader

Fade sound in an out between decks by sliding the cross fader left and right

9. Mixing in a second track

Make sure a track is loaded into Deck A and the CROSSFADER is all the way to the left.

Next load a track into Deck B and hit PLAY. Deck B should not be audible if the crossfader is all the way to the left. Slowly Mix in the track by gradually dragging the crossfader to the right. The track playing on Deck B should come into focus as the track on Deck A slowly fades out.

Once you've mastered that, check out the resources below to learn more advanced mixing techniques and how to add FXs

10. Learning the basics of Digital DJ'ing

Please refer to this webpage for more information on learning the basics of DJ'ing with Traktor Pro
