buttonmakers.net

buttonmakers.net is a website where you can both download templates for buttons to make them in Word or Photoshop, as well as use their online web button designer. These instructions will cover using the online button design tool but if you're more comfortable using Word, Photoshop or one of the other programs they support you can download and use the downloadable templates. (Even though it says Photoshop Template you can use a variety of programs) Please note this Design Tool is no longer being supported so you may run into issues creating an account.

Head over to Brick City Printing to order custom buttons, magnets, and stickers!

Design and Print at Home for Free

Check out our totally-free-for-everyone deisgn tool! No subscriptions or monthly fees at all, no purchases necessary! Just sign up and start printing those buttons! We also have super-spiffy and completely free templates for Photoshop (that also happen to work in the totally free program PhotoPea.)
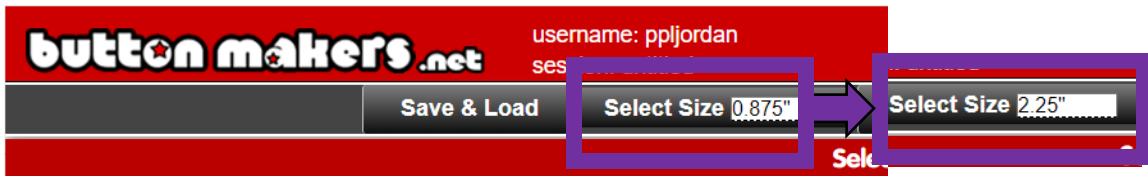

Online Button Designer → ← Downloadable Templates

After clicking the Design Tool button, either login to your account or create a new one.

Sign in to an existing account
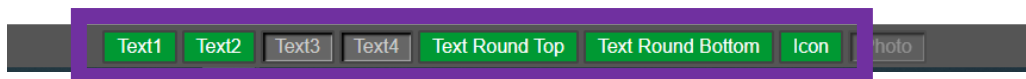

Create a new account

After creating an account and/or signing in, you will be brought to the main screen of the online button designer.

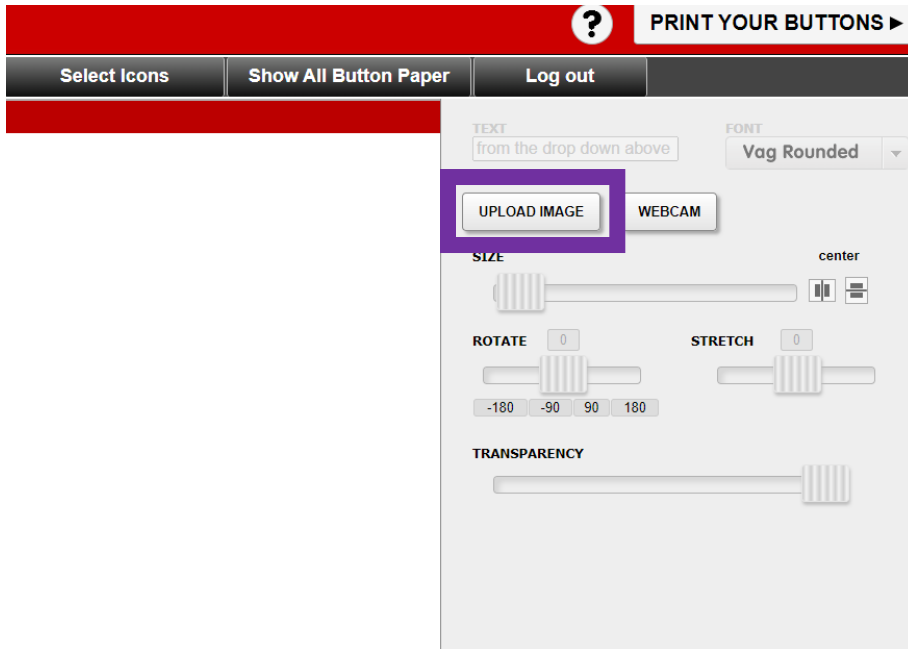

1. Change Button Size to 2.25. You MUST change this first or your entire design will reset when you change it later.

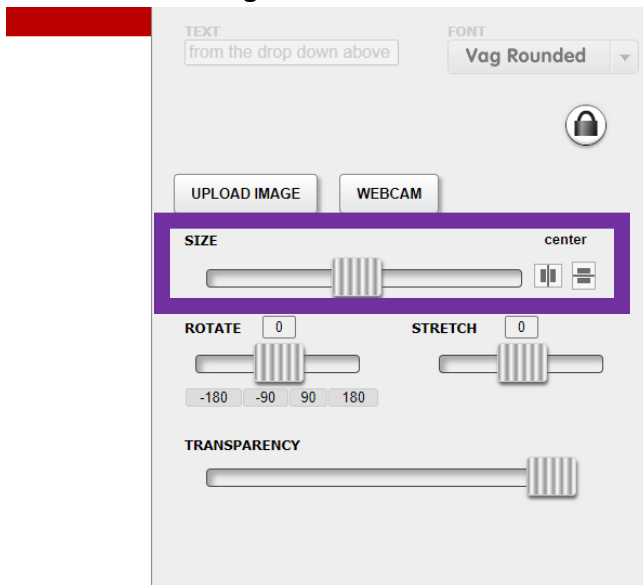

2. Remove unneeded elements by clicking the green buttons to make them gray.
